

Water Supply Association of BC 2021 SPRING WORKSHOP

The 2021 Spring Workshop for the Water Supply Association of BC will take place via ZOOM video conference on Friday, April 9th, 2021. It is our second video conference and we have a strong speaker's lineup scheduled.

A broad range of topics will be covered by our speakers including:

- Spring Forecast for Runoff in 2021
- New UV Disinfection Facility in Lake Country
- Provincial Guideline updates for:
 - Design of Water Systems
 - UV Systems
 - Emergency Response and Contingency planning
- A Source Protection Toolkit for water utilities
- Range and Recreation Collaboration example in Lambly Creek Watershed
- PFAS – Forever Chemicals – Are we at Risk?
- Groundwater Licensing Update
- Interactive Polling sessions for our Attendees
- WSABC Bursary Award to an Okanagan College second year student
- A very brief history of the story of two of our Lifetime members

Eventbrite will be available to register at the WSABC Website within the next week.

We have the second year Okanagan College Water Technology class along with UBCO science and engineering students attending our session. Sponsorship to facilitate their attendance is available when signing up for our workshop

We recommend ordering-in lunch as it will be a full day. We are in the process of securing Operator Continuing Education Unit (CEU) credits for the day. The operators must be signed up to be eligible to receive them.
